Experience

Consultant- Tech Associate(TA) at ***The Merakis Ventures(Pune).*** **2024.03–pres.**

◇ Designed and developed interactive Power BI dashboards by building comprehensive data models involving 10+ tables, improving reporting efficiency and business insight discovery.
◇ Implemented star and snowflake schemas with well-defined relationships to ensure accurate analytics and performance optimization.
◇ Created complex DAX measures and calculations to support advanced analytical and reporting requirements.
◇ Configured row-level security (RLS) roles to control data access based on business rules.
◇ Published and deployed reports to Power BI Service, configured scheduled refreshes, and managed Power BI Gateways for on- premise data sources.
◇ Collaborated closely with business analysts, project managers, and stakeholders to gather requirements and deliver customized Bl solutions.
◇ Demonstrated strong analytical problem-solving skills to support data-driven decision-making across business functions.
◇ Implemented performance optimization techniques such as measure optimization, reduced cardinality, and efficient filtering.
◇ Developed KPIs, calculated columns, and time-intelligence measures to support trend analysis and business tracking.

Process Executive at ***Infosys BPM(Pune)***. **2021.12–2022.08**

◇ Collaborated closely with internal teams, including Planning, Finance, and Facilities, to ensure business requirements were met efficiently.
◇ Played a key role in delivering timely and accurate customer communications, resolving issues and optimizing service delivery.
◇ Managed day-to-day productivity, quality, and availability, ensuring smooth operations and timely service.
◇ Analyzed operational workflows and recommended process improvements to enhance overall business performance
